

**ABSTRACT OF THE DISCLOSURE**

1           In a method of operating a motor vehicle with an  
2 electronically controlled automatic clutch device, a control  
3 device and one or more data-storing devices for values of  
4 operating quantities and parameters, the values are stored in at  
5 least duplicate form in the data-storing device. The data are  
6 stored in prescribed formats and the integrity of the data is  
7 checked according to prescribed criteria, to ensure that  
8 incorrect data are not used in the operation of the vehicle.
